

We take our global expansion very seriously, we are currently receiving distributorship requests from candidates for your country/region market.

We have a plan to bring distributorship to the market for the foreseeable future. But we may choose to change this strategy in the near future, given this fact we are currently looking for distributors in your country.

The candidate for a distributor to represent us should have the following characteristics: high accuracy, business experience, successful business background, ability to work well with the given task, trading experience, current market knowledge, and sufficient capital.

If you want more detailed information to make the application, please contact us. If we continue with our development plans in this market, we will evaluate all candidates fairly and contact those who best meet the requirements we are looking for in a distributor area for the first stage of the selection process. Of course, the choice of a true distributor region is always at the discretion of Rulomatik.

Thank you for your interest in Rulomatik!

Rulomatik International Distributorship Unit

What is Rulomatik

Rulomatik Power By OTOMATSAN

Rulomatik™ vending machines; It provides 7/24 sale of micro fiber car drying towel, car mat, sports towel, beach towel, worship products and many other products that we specially produce by using coins, tokens or other payment systems.

Protected by patent rights, Rulomatik vending machines are provided with the same quality at the affordable prices that consumers can reach since we eliminate the costs of cutting, folding, packaging, labeling, gelatinizing in the inner reservoir products.

Today, Rulomatik™, which is widely used in more than 30 countries around the world, is adapted to the currency and language of the country in which it is serviced. Rulomatik is becoming an indispensable habit of drivers by becoming popular in the countries where it starts to sell.

How was RulomatikTM established

Rulomatik™ was founded by three entrepreneurs in 2011 under the subsidiaries of Anadolu Group in Bursa. In January 2011, while on a trip abroad, they went to the self-service car wash to wash their car at night. But it was difficult for them to dry their cars. They wanted to find a solution. They found a solution to dry, clean and polish their cars. Then they applied for international patent rights.

How was Rulomatik™ established, which takes a large part in the driver's life and How did it achieve such a great success in such a short time?

They introduced the first A series vending machine in 2014. B, C, D and E continued serial production. Rulomatik™ started to serve overseas in 2018, literally globally. The story of Rulomatik™ also includes some difficulties and obstacles. When the project started to be produced for the first time, things went bad, production costs were too high. In fact, it was only with the D-series that it was possible to switch to 1000 series production. Even the initial investment came much earlier than expected. More than 8500 vending machines took their place in the field. It was a practical product used by an average of 500,000 drivers per day.

In the early years, Rulomatik™ proceeded only with the financing of Anadolu Bilişim Group, of which it is a member. With the D series, it received millions of euro investment offers from investor companies. Rulomatik continues it's activities with a 51% stake in the three founding entrepreneurs in Bursa.

Patented Idea

Rulomatik™ is one of the vending machine manufacturers using the Stand-Alone method and is the regional leader in production. The founders of the company patented Rulomatik, which they invented and worked on for many years on research and development and prototype.

They started mass production and added practicality to human life.

Rulomatik™ (Otomatsan) is a company that manufactures software, hardware, mechatronics, electronic industry,

manufacturing plant in Bursa Organized Industrial Zone and manufacturing in a total closed area of 2000 m² and producing more than 4750 high-tech electronic devices per year.

Our company, which celebrated its eighth year in 2020, has been increasing its technical infrastructure and production power day by day as a successful producer.

Every product that it produces and develops, with the contribution it provides to its customers and the sector it serves, concludes its projects with the awareness of, "social benefit" while also paying attention to the environment and human health. In addition contributing greatly to the World economy with these values, Otomatsan continues to use its resources to develop all its layers from supplier to consumer. particular, is involved in peoplewith oriented productions understanding that goes beyond being a manufacturer.

Commercial Working Method By Giving The Rent Price
Commercial Working Method Using Ad-Space
Through Wholesale Sales,
Commercial Working Method

Profit Margin Commercial Product Method Per Product Commercial Working Method with Sponsor Presentation

First Method

One of our partners buy our vending machines for manufacturing price. After that, they sell the vending machines to the locations above the price that they have bought. Also, they make a profit from the towels, they buy one piece of the towel from us and they sell it with a high range of profit to locations. They are planning to order more products just because there are lots of request of vending machines and our towel.

Second Method

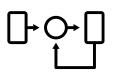

One of our partners uses the selling and renting system. They sold half of our machines which are purchased at first step. They gained return of the investment so early. With the rest of the vending machines, now they are working on the renting system. They gave their machines for free to the locations and they share their profit with location owners. Locations take a percentage of share from the profit.

Third Method

One of our partners had really good contact with locations. When they bought the products, they sold all of the products above the price that they bought. Also, selling them the towels. They have already taken all of their investment back and now they continue gaining from towels. There are lots of requests for the vending machines and the towel. Now they are gathering all requests and will order a new set of products.

Forth Method

here are many ways to get income from our machine One of them is like what one of our distributor did. In this way, they own both machines and towels alone. They take rent for the machines from the locations. The rent varies according to location and population. Since that country is small, also they follow the machines easily. Very profitable for a long time as it will help you to get your investment back in a short time.

ORULOMATIK°

MORE PROFITABLE, FASTER, AND STRONGER.

COMMERCIAL AND TECHNICAL ORIENTATION EDUCATION

We provide orientation training to our Distributors / Dealers, which includes commercial working methods and technical secrets.

PROCESS; Stable, systematic and automated earnings at your investment.

We adapt to the latest innovations in the World. Rulomatik, which can produce its own main card and its parts, and has the production facility which is high-tech products, can operate mdb-executive and has the highest performance microprocessor selections, can work with contactless credit cards, banknotes, coins, smart cards, and employee cards.

Rulomatik™ all over the world! World's biggest chain of vending machines on disposable products.

Submitting to the World

We currently have distributors in 27 countries, and we have more than 200 regional dealers affiliated with these distributors and working to reach more than 74 countries soon!

The Rulomatik Distributorship business model is profitable for two main reasons

EVERY DAY, MORE THAN 500,000 PEOPLE AROUND THE WORLD USE RULOMATİK™ PRODUCTS.

Every day in the world, billions of cars are washed by billions of drivers, a microfiber car drying towel is an important requirement in the world in which we live and work.
Rulomatik™ vending machines are designed to provide efficient and sustainable systematic access to inner reservoir products

INVEST VALUE €80K - €350K

Rulomatik investment amount is changing between €80.000- €350.000 depend on your country or region. This investment amount is included Rulomatik vending machines, inner chamber products, spare parts.

4 - 8 MONTH

You can gain your return your investment between 4-8 month depend on your country or region and depend on your investment amount

How does Rulomatik cooperate with it's distributors worlwide?

The person or the company that wants to bring Rulomatik products into heir countries, which we have the international manufacturing patent rights, must have commercial activities in their countries, also they must know their country well and It is important fort them to have observationability.

Microfiber car drying towels which are sold automatically by a vending machine are the locomotive of the Rulomatik products, which adapt to locations successfully into places where the cars are washed.

You can make Rulomatik Business plan which is the most important thing in choosing the candidates who carry our terms and conditions, even though our experts give approximately two days of educations about commercial orientation and technical secrets, if our candidates know about their market and made a proper research will provide them to take a step which will be successful and fast. Rulomatik becomes very popular among the drivers in every country that we get into.

We expect them to keep this popularity and we take them under our protection. Until now we have mentioned Rulomatik country distributorship, but we shouldn't forget that in some countries distributorship takes place as a regional distributorship.

Making a voice call in the precontact stage with a representative, who is in the operation unit, for being distributor candidate and requests, will provide us to develop a better contact.
