WARPOINT ARENA: A PIONEERING VR BATTLE EXPERIENCE

WARPOINT ARENA is not just another game; it's a community where up to 10 friends or rivals come together to compete in a virtual landscape that's as challenging as it is thrilling.

Imagine the tactical depth of **Counter-Strike** combined with the active, on-your-feet excitement of **lasertag** — all within the immersive world of **virtual reality**.

It's accessible, inviting players from 8 years up, and designed to be the next big thing in your gaming or entertainment business portfolio

ELEVATING THE VR GAMING EXPERIENCE

In four years, our **20-person team** developed WARPOINT ARENA, a cutting-edge VR game combining detailed worlds, deep gameplay, and innovative features. Offering varied tactical modes and environments.

Versatile Game Modes: Three modes offering varied strategic play.

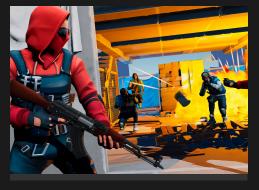

Rich Environments: Explore 20 unique, detailed battlegrounds.

Tactical Diversity: Choose from 32 weapons and 8 characters for tailored gameplay.

TEAM COMBAT

In this game mode, immediately after the death of their virtual character, a player must return to their team's starting area and wait for the victory or defeat of the rest of the team members. Only after this can they choose a weapon again and continue playing.

The duration of a game round in this mode is limited to 5 minutes. Players play until one of the teams achieves 5 victories, or the winning team is determined by the highest number of victories within the allotted time.

MEAT GRINDER

In this game mode, immediately after the death of their virtual character, a player can return to their team's starting area, choose their weapon again, and continue the game.

EQUAL COMBAT

This game mode is conducted in the "Team Combat" mode, but in this mode, all players start the game rounds with the same weapon. Every 2 rounds, all players have their weapons changed.
