Software (end user license)

- Windows 10
- Circuit simulation SW: Assetto Corsa, Assetto Corsa Competitione, Project CARS 2, DiRT Rally 2.0 (other on request)
- ESET Antivirus - 1 year license
- Acronis True Image - backup software
- TeamWiever - remote acces software

For commercial use it‘s needed to buy the correct licences of all the software, contact us for more information

Motion system

- Powerfull SCN6 servo actuators (3x stronger than standard SCN5 actuators)
- No weight limit (lasts more than 500kg)
- More accurate and durable system
- Overworked system of the rear traction loss, even more smooth and accurate than before
- Recommended for professionals, commercial use

This motion system has super powerfull servo motors, which are able to simulate irregularities of the track better, stronger and straighter, regardless of the drivers weight. This brand new motion system is briliant for professional daily use, and for bigger drivers.
